# MEET YOUR MATCH™

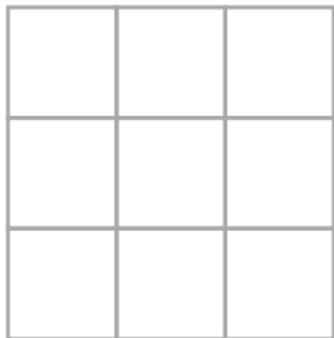

## What You Need To Do

Arrange the nine squared pieces (using the black sides) in a 3 x 3 grid so that the heads of Don, Dale, Dick and Duke Difficult match up to their respective bodies.

(On the left, Dick Difficult's top and bottom match. On the right, Duke is wrongly wearing Dale's pants!)

The completed puzzle will form a square like this:

### **Our Best Advice**

As you will soon find out, putting this puzzle together and matching up the heads and bodies of Don Difficult and his three brothers is not easy! There are two ways to complete the puzzle, and here is our best advice for helping you solve it.

- Relax and have fun! You're using your brain, even if you have 'met your match' and cannot complete the puzzle!
- Lay out all nine pieces (with the black side showing), so you're aware of all your options and can keep switching pieces until you, hopefully, complete the puzzle. Try not to pay too much attention to the nasty words of Don and his brothers on the reverse side (the white side) of the nine pieces. Those guys can be so difficult!
- Realize that some days you will put the puzzle together in 5-10 minutes. Other days, you will give up in frustration and feel the need to meditate.
- If other people are around who want to try completing the puzzle, make it a game where each person in the room gets seven minutes to solve it. (You can set a stopwatch on your phone.) You may even just want to time yourself!
